Yes

Explain:

Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those

models, and an explanation of the rating system?   Yes

Website address: http://www.sprint.com/landings/accessibility/docs/HAC_PDF_List.pdf

Explain:

Consumer Outreach

Describe consumer outreach efforts in the past 12 months: Sprint Nextel posted information regarding hearing aid use with digital wireless phones on its website, including a list of HAC-compliant phones and their respective ratings. Sprint Nextel also worked with its handset vendors to revise user guides to include a section containing helpful consumer information about the ratings and interoperability with the consumers' hearing aids. Through its membership in ATIS and the CTIA, Sprint Nextel also participates in several events that allow interaction between consumers, service providers and manufacturers. Specifically, Sprint Nextel regularly participates in the Hearing Loss Association of America ("HLAA") conventions. Sprint Nextel assists in numerous other outreach activities through its Sprint TRS organization.

Methodology for Functionality Levels

Each device is evaluated by a Sprint Nextel product and technology committee who selects the appropriate "functionality level" based on capabilities from the simplest basic devices to high-end smart devices with complex operating systems (e.g., Android). The functionality levels for 2010 are "basic", "middle", and "advanced". Advanced = devices with a smartphone type operating system (e.g., Andriod, RIM, Microsoft-7, Palm); Medium = devices that are messaging phones (qwerty keyboards, enhanced browsers (HTML, etc.); Basic = devices that are low end / low cost feature phones (you can message, but requires triple tapping), you can browse but it is primarily WAP
